About Me

I was *born in Wales*, but lived my whole life so far in **western Slovakia**.

I have two younger brothers. Growing up, I was part of a small home-schooling group, founded by a group of mothers, who wanted a different kind of primary education for their kids.

- About page with two pairs of images highlighting some of my background and showing a picture of my family and elementary school group of kids.
- Then there are four columns with icons at the top, and image in the middle, and a short paragraph. These describe the main activities I am engaged in.

- Then follows a deeper description of each of those activites.

Professional Experience

Developer - Balance Estimation and Analysis Model

Working with a Slovak company in the energy sector, which builds and runs battery parks for electrical energy (<https://greenbat.sk/>). Developing a program using machine learning algorithms, that collects and stores data on the power grid, and makes real-time predictions about its state in 15-minute intervals. The project is nearing completion and has great potential to increase the effectiveness of the company and its profit.

Content Creator - Beginner Rubik's Cube Course

Working on an extensive, online video course, teaching the basics principles and a solving method for the classic Rubik's Cube. Developed a unique learning experience, where the student can follow along with me, their cube being identically shuffled as mine throughout the entire course. Total lecture count of 63, 50 lessons of learning material - theory and practice, 13 of history and preparation. Tested the method successfully in person on different age groups. This project consumed a lot of my time, and unfortunately, I didn't finish it. I think it was a combination of me losing interest in the topic itself, being a perfectionist, and it being too hard for me at the

- A resume page that shows the most interesting projects I have been involved in and my past education.
